

Home Care Services, Scotland, 2010

Published: 30 November 2010

A National Statistics Publication for Scotland

1. Introduction and key points

The purpose of this Statistics Release is to present the latest national figures for home care services provided or purchased by local authorities in Scotland. All local authorities in Scotland provide Home Care services which give people the support, practical help and personal care that they need to live as independently as possible in the community.

A substantially revised home care services statistical data collection was introduced in 2010. Information is now collected for each person who receives a home care service, a meals service and a Community Alarm or Telecare service. Definitions have been kept consistent (where applicable) to maintain trends over time except for client groups. Client groups and definitions were revised in 2010, and multiple client groups were allowed for the first time. Client group analysis over time should therefore be treated with caution. Further details can be found in Section 4 'Background information on the collection of the data'.

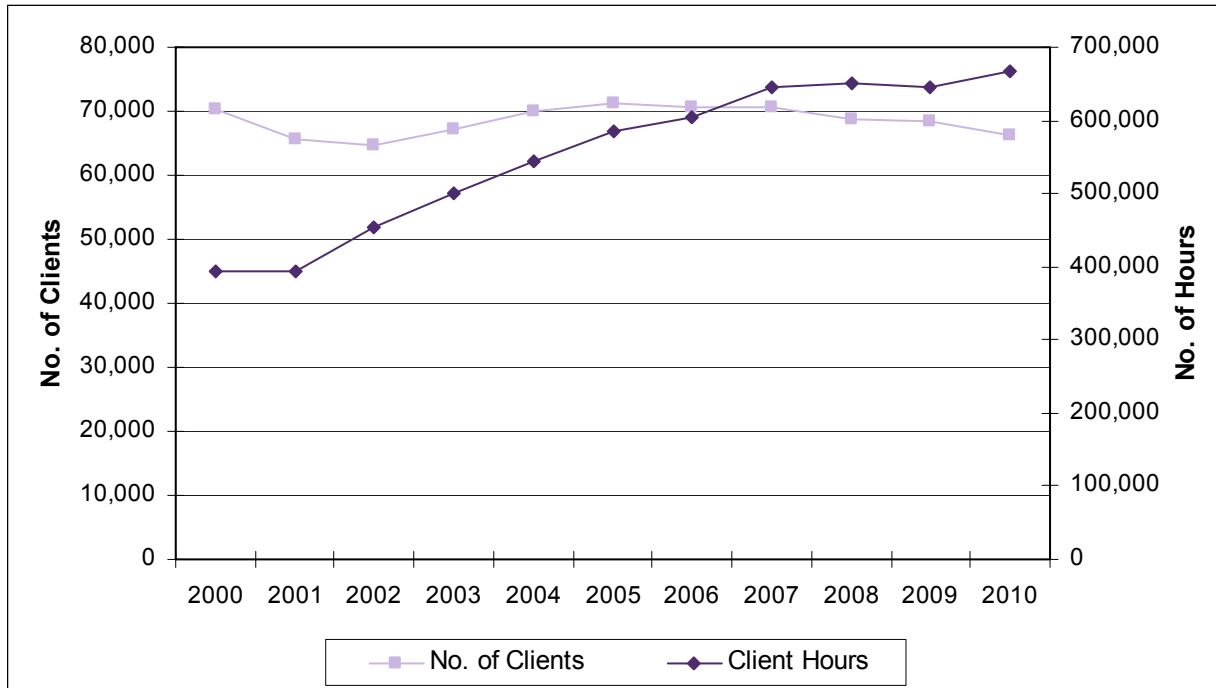

All figures relate to the last week in March (that is the week which includes 24th March 2010) and are provisional and, as such, may be subject to change. The final figures will be published in future publications.

Key points

- In the last week in March 2010, there were 66,222 home care clients. The number of home care clients has declined over the last 3 years - after an increase in clients each year between 2002 and 2005 and a levelling in 2006 and 2007 (Chart 1).
- The number of hours of home care provided to clients has increased, by around 3 per cent over the latest year to around 666,400 hours (Chart 1).
- The average hours received by each client in a week has increased steadily (apart from a very slight decrease between 2008 and 2009), from 5.6 in 2000 to 10.1 in 2010. (Chart 2).
- The number of older people (aged 65 and over) receiving an intensive service (more than 10 hours per week) was around 18.1 clients per 1,000 population as at the last week in March 2010. This has steadily been rising since 2000 (apart from a very slight decrease between 2008 and 2009) (Chart 3).
- Of the 66,222 home care clients in the last week in March 2010:
 - 28,544 (43 per cent) of home care clients also had a Community Alarm or another Telecare service.
 - 7,498 (11 per cent) of home care clients also received a meals service.
 - 52,586 (79 per cent) home care clients received personal care services.

2. Home Care Services

Chart 1: Home care clients and hours provided , 2000-2010

Source: Home Care Statistical Return (See Annex Table 2)

There was an estimated 666,400 hours of service provided to 66,222 clients in 2010. The number of clients dropped from 70,210 in 2000 to 64,546 in 2002, it then increased to 71,094 in 2005 and has fallen to 66,222 in 2010 (see Chart 1). The number of client hours has increased by 70 per cent since 2000. In 2000 clients received, on average, 5.6 hours of home care per week. This has risen steadily to 10.1 hours for 2010 (See Annex Table 2, and Chart 2).

Chart 2: Average Number of Hours Provided per Client, 2000-2010

Source: Home Care Statistical Return

In 2005, the data collection was refined to collect information on older people receiving 10+ hours per week. Previously these figures were estimated.

The estimated number of older people receiving intensive home care (more than 10 hours per week) increased each year between 2000 and 2005 but decreased by less than 1 per cent (102 clients) between 2005 and 2006 before increasing steadily to 2008 (15,332 clients). There was a small decline (109 clients) in 2009, before increasing again in 2010 (15,736 clients). In 2010 there were 18.1 clients per 1,000 population aged 65 or over that received intensive home care - compared with 17.5 in 2009 (See Annex Table 2).

Chart 3: Clients aged 65+ receiving 10 hours + per 1,000 population aged 65+, 2000-2010

Source: Home Care Statistical Return

Of the estimated 66,222 clients who received a home care service provided or purchased by a local authority in 2010, 34 per cent received at least part of their home care service from a private or voluntary provider - compared to only 10 per cent in 2000 (Table 1, Annex Table 6) (Figures may not sum due to rounding).

Chart 4: Proportion of Home Care Clients by Provider, 2000- 2010

Source: Home Care Statistical Return

Chart 5: Proportion of the Hours of Home Care Service by Provider, 2000 – 2010

Source: Home Care Statistical Return

The average number of contact hours per client for those receiving local authority provided services only was 7.2 hours per week, compared to 15.8 hours for those receiving home care from a private or voluntary provider only (See Table 1).

278,916 hours were provided to clients receiving home care services solely from the private or voluntary sector. This has increased by 61 per cent since 2005 when 173,330 hours were provided (see Annex Table 6).

Additionally, 74,040 hours (11 per cent) were provided by some combination of local authority, private and voluntary provision as at the last week in March 2010 (See Table 1 & Chart 5).

The proportion of service hours provided solely by local authorities has been decreasing steadily from 82 per cent in 2000 to 47 per cent in 2010. The majority of this decrease is due to the increase in service provided or purchased solely from the voluntary and private sectors (see Annex Table 6).

Table 1: Number of Home Care Clients and Hours Provided / Purchased by Provider of Service, 2010

Provider of Service	No. of Clients	Client Hours	Hours per Client
Solely from local authority	43,647	313,444	7.2
Solely from private/voluntary sector	17,632	278,916	15.8
Combination of provision from LA and private/voluntary sector	4,943	74,040	15.0
Total	66,222	666,400	10.1

Source: Home Care Statistical Return

Profile of Clients Receiving Home Care Services

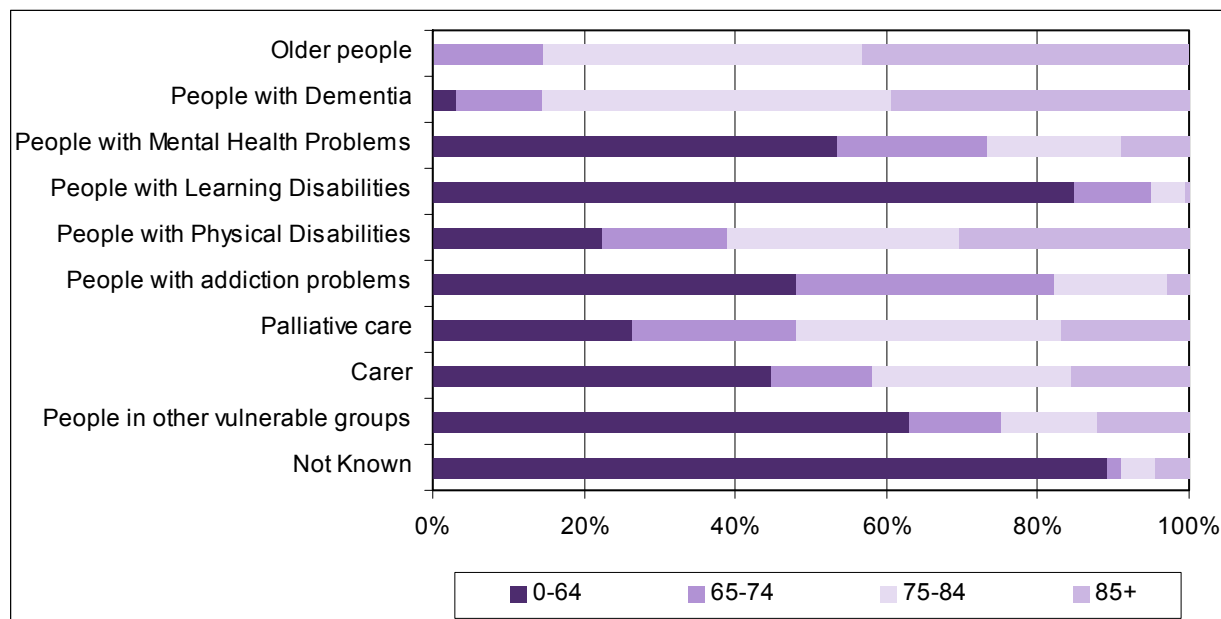

Approximately 45 per cent of clients receiving home care services provided or purchased by local authorities were older people. 34 per cent of clients had physical disabilities. An estimated 67 per cent of clients were female and 33 per cent were male. An estimated 81 per cent of all clients were aged 65 years or over (See Table 2 & Chart 6).

Table 2: Age, Client Group and Gender of Clients Receiving Home Care Services, 2010

Client Group	Age Groups					Total
	0-64	65-74	75-84	85+	Unknown	
Older people	84	4,193	12,560	12,716	7	29,553

Chart 6: Client Group of Clients Receiving Home Care Services by age group, 2010

Source: Home Care Statistical Return

Note does not include 13 clients due to age being unknown.

An estimated 64 per cent of clients in receipt of a home care service were living alone (See Table 3). Note that this information was not provided by all Local Authorities.

Table 3: Living Arrangements of Clients Receiving Home Care Services, 2010

Living Arrangements	Number of Clients	%
Living Alone	30,352	64
Other	17,216	36
Total known clients	47,568	100
<i>Unknown</i>	<i>18,654</i>	<i>-</i>
Total Clients	66,222	-

Source: Home Care Statistical Return

Note: 31 Local authorities returned (partial) data on if their clients lived alone. Of these 31 local authorities, 13 provided complete data on whether their clients lived alone.

Level of Home Care Services Provided

In 2010, 23 per cent of under 65's received 20 hours or more home care a week compared with 6 per cent of over 65's.

Table 4: Number of Home Care Clients by Level of Service Received, 2010

Level of Service	Aged Under 65		Aged 65+		Unknown	Total number of clients
	Number of Clients	%	Number of Clients	%	Number of Clients	
Less than 1 hour	570	5	2,200	4	0	2,770
1 hour to less than 2 hours	1,304	10	7,587	14	4	8,895
2 hours to less than 4 hours	2,327	19	11,218	21	3	13,548
4 hours to less than 6 hours	1,467	12	6,070	11	0	7,537
6 hours to less than 8 hours	1,131	9	6,798	13	4	7,933
8 hours to less than 10 hours	649	5	4,051	8	0	4,700
10 hours to less than 15 hours	1,438	11	9,011	17	2	10,451
15 hours to less than 20 hours	741	6	3,757	7	0	4,498
20 hours or more	2,922	23	2,968	6	0	5,890
Total	12,549	100	53,660	100	13	66,222

Source: Home Care Statistical Return

31 per cent of home care clients received at least 10 hours of service provided or purchased by a local authority in 2010. This percentage has gradually increased over the last 10 years from 15 per cent in 2000 to 31 per cent in 2010. The number of clients receiving less than 4 hours has decreased over the same period from 54 per cent to 38 per cent. (see Annex Table 5 & Chart 7)

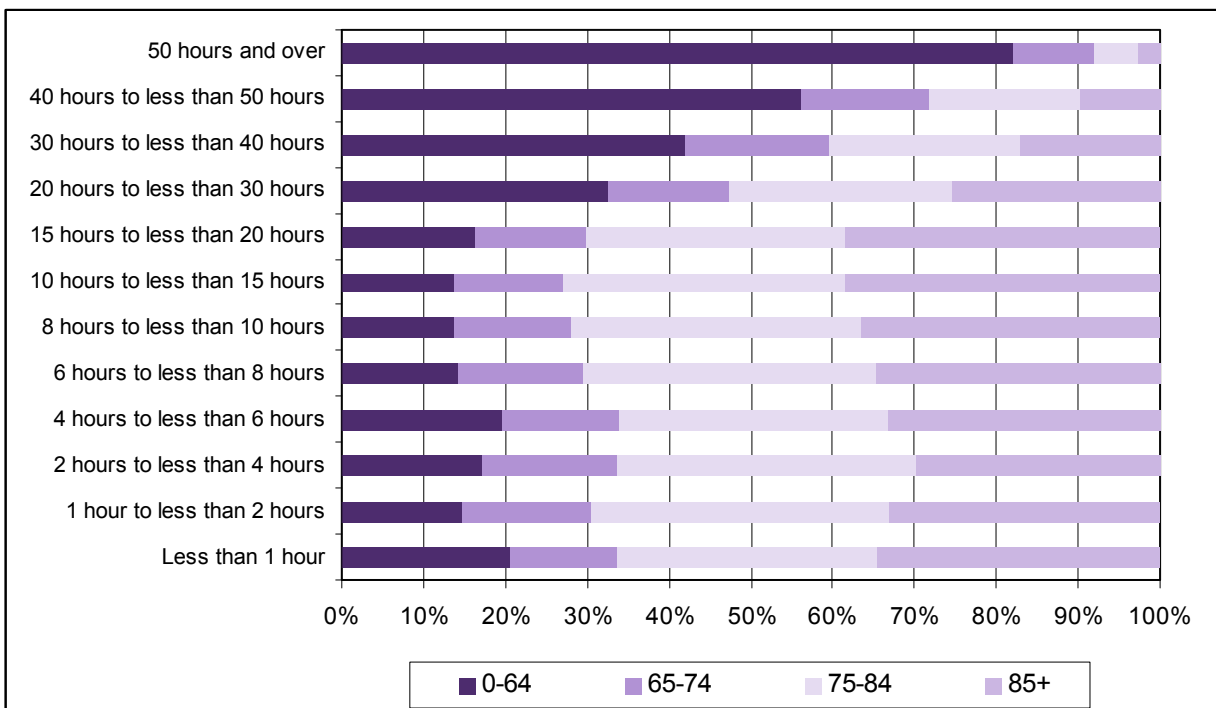

Chart 7: Level of Service, 2000-2010

Source: Home Care Statistical Return

People aged 65 and over account for 79 per cent of people receiving less than 1 hour of home care, compared to 18 per cent of all people receiving 50 hours of home care or over and 81 per cent of all people receiving home care (see chart 8).

Chart 8: Ratio of clients age groups by level of service, 2010

Source: Home Care Statistical Return (See Annex Table 4)

Note does not include 13 clients due to age being unknown.

Home Care clients receiving services in addition to their Home Care service

In 2010 for the first time, information was collected on home care clients who received other services in their own home. These included; Community Alarms, other Telecare and meals. The 'Background information' (section 4) contains definitions of Community Alarm and 'other Telecare' services.

Community Alarm and other Telecare

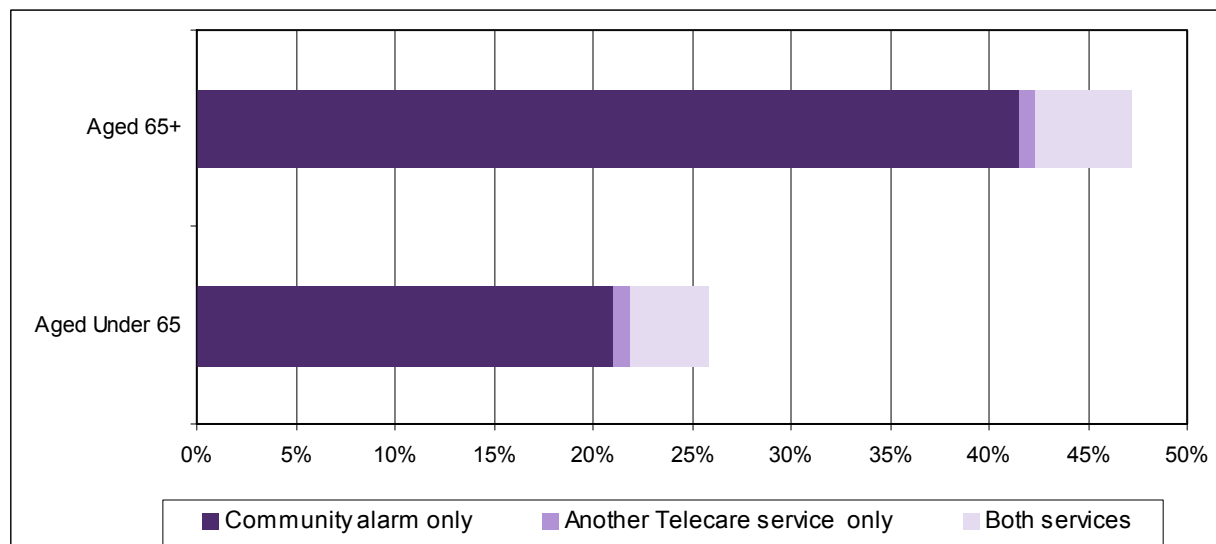

Table 5 shows that as at March 2010, there were 28,544 (43 per cent) home care clients who also had a Community Alarm or another Telecare service. Of the 28,544 home care clients who also had a Community Alarm and/or other Telecare services, 87 per cent only had a Community Alarm. Moreover, of the 28,544 home care clients who also had a Community Alarm and/or other Telecare services, 89 per cent (25,296 clients) were aged 65 and over.

Table 5: Clients who are receiving home care and a Community Alarm and/or another Telecare Service by age group, 2010

Age Group	Total Home Care clients	Number of clients			
		Community alarm only	Another Telecare service only	Both services	Total
Aged Under 65	12,549	2,639	109	497	3,245

Other services

The following tables and charts contain information about personal care and meal services which home care clients can receive in their own home.

Table 8: Home Care clients receiving other services by age group, 2010

Age Group	Total Home Care clients	Number of clients			% of Home Care clients		
		Personal care	Hot Meals ¹	Frozen Meals ¹	Personal care	Hot Meals ¹	Frozen Meals ¹
Aged Under 65	12,549	7,246	251	292	58%	2%	2%
Aged 65+	53,660	45,332	3,872	3,096	84%	7%	6%

Total	66,222	52,586	4,123	3,388	79%	6%	5%

Source: Home Care Statistical Return

Note there is a total of 13 clients who receive both meals services

¹ Excludes Scottish Borders who were unable to provide information on meals clients

Of the 66,222 home care clients, 52,586 (79 per cent) also receive personal care. Table 9 contains information on those clients who receive home care and other services by client group. 49% of the clients who receive personal care where in the 'older people' client group (25,755 clients), followed by 33% who had physical disabilities (17,509 clients).

Overall, 7,498 home care clients also received a meals service. 4,123 (6 per cent) of home care clients received a hot meals service and 3,388 (5 per cent) received a frozen meals service. 13 clients received both a hot and frozen meal service. Note the Scotland meals data excludes information for Scottish Borders, see section 4 (Background information) for further details.

Table 9: Home Care clients receiving other services by client group, 2010

Client Group	Total Home Care clients	Number of clients			% of Home Care clients		
		Personal care	Hot Meals ¹	Frozen Meals ¹	Personal care	Hot Meals ¹	Frozen Meals ¹

¹ Excludes Scottish Borders who were unable to provide information on meals clients

² Other includes palliative care and carers

Table 10: Home Care clients receiving other services by level of service, 2010

Level of service	Total Home Care clients	Number of clients			% of Home Care clients		
		Personal care	Hot Meals ¹	Frozen Meals ¹	Personal care	Hot Meals ¹	Frozen Meals ¹
Less than 1 hour	2,770	1,401	149	100	51%	5%	4%
1 hour to less than 2 hours	8,895	4,410	692	291	50%	8%	3%
2 hours to less than 4 hours	13,548	10,088	796	575	74%	6%	4%
4 hours to less than 6 hours	7,537	6,303	471	421	84%	6%	6%
6 hours to less than 8 hours	7,933	7,196	552	478	91%	7%	6%
8 hours to less than 10 hours	4,700	4,292	367	354	91%	8%	8%
10 hours to less than 15 hours	10,451	9,744	667	783	93%	6%	7%
15 hours to less than 20 hours	4,498	4,168	271	242	93%	6%	5%
20 hours or more	5,890	4,984	158	144	85%	3%	2%
Total	66,222	52,586	4,123	3,388	79%	6%	5%

Source: Home Care Statistical Return

Note there is a total of 13 clients who receive both meals services

¹ Excludes Scottish Borders who were unable to provide information on meals clients

Of those that receive home care and personal care (52,586 clients), 30% receive less than 4 hours of home care and 83% receive less than 15 hours of home care a week.

3. Additional Services

In 2010, information was collected for the first time on every person who receives/uses a meals services (provided or purchased by the local authority) during census week.

Information was collected separately on the number of clients receiving a hot meals service and the number of clients receiving a frozen meals service during the census week. Note this information was provided by all local authorities who offer this service except for Scottish Borders – see section 4 (Background information) for further details. Eilean Siar do not offer a meals service.

Table 11: All clients who are receiving a meals services, 2010

Age Group	Number of clients receiving a meals service	Number of clients		% of clients	
		Hot Meals ¹	Frozen Meals ¹	Hot Meals ¹	Frozen Meals ¹
Unknown	34	31	3	91%	9%
0-64	831	422	409	51%	49%
65-74	1,373	744	629	54%	46%
75-84	3,791	2,187	1,604	58%	42%
85+	4,417	2,682	1,735	61%	39%
Total	10,446	6,066	4,380	58%	42%

Source: Home Care Statistical Return

Note there is a total of 13 clients who receive both meals services

¹ Excludes Scottish Borders who were unable to provide information on meals clients

As at March 2010, there were 10,446 clients receiving a meal service which was provided or purchased by the local authority. 13 per cent of these people were aged between 65 years and 74 years, 36 per cent were aged between 75 years and 84 years, and finally, 42 per cent were aged 85 years and over.

4. Background information on the collection of the data

Local authorities were asked to provide details of all home care services provided by their own staff, and in addition, services bought in from other local authorities, and private / voluntary organisations. Data were collected with respect to the week including 24th March 2010.

A revised home care services statistical data collection was introduced in 2010. The home care information is now being collected on an individual record basis as opposed to aggregate tables via ProcXed.Net. ProcXed.net aims to support and promote the electronic exchange of information in Scotland. It reduces administrative burdens and increases the speed, ease and accuracy (via inbuilt validation checks) of information exchange. It additionally encourages best practice and improves access to benchmarking information. Moreover, the system provides a secure method of sharing data. Further information about ProcXed.Net can be provided on request using the contact details provided on the following page.

The home care statistical collection asked for information to be returned on every person who receives/uses:

- Home care services (provided or purchased by the local authority) during the census week.
- Meals services (provided or purchased by the local authority) during census week.
- A Community Alarm during census week.
- Other Telecare services during census week.

In addition, the following information was optionally asked of local authorities:

- Clients who receive housing support (provided or purchased by the local authority) during census week.
- Clients who receive shopping services (provided or purchased by the local authority) during census week.
- Clients who receive laundry services (provided or purchased by the local authority) during census week.

Local Authority responses to optional items

- 9 Local authorities returned the date of last care plan.
- 31 Local authorities returned (partial) data on if their clients lived alone. Of these 31 local authorities, 13 provided complete data on whether their clients lived alone.
- 15 Local authorities returned data on clients who received housing support.
- 15 Local authorities returned data on clients who received shopping services.
- 16 Local authorities returned data on clients who received laundry services.
- 3 Local authorities returned data on clients who had an IoRN (Indicator of Relative Need) Score.

For each of the optional items, further analysis will be carried out, and a discussion paper written. These will be published as 'data under development' over the coming months.

In 2010, local authorities identified whether the hours of home care they provided were 'scheduled' or 'actual' hours during the census week. 21 local authorities provided 'scheduled' hours, 5 local authorities provided 'actual' hours, and 6 local authorities provided both 'scheduled' and 'actual' hours.

Client groupings

Definitions have been kept consistent to maintain trends over time except for client groups. Client groups and definitions were revised in 2010, and multiple client groups were allowed for the first time. Client group analysis over time should

therefore be treated with caution. Full definitions can be found in the 'Home care services guidance notes' which can be found at: <http://www.scotland.gov.uk/Topics/Statistics/Browse/Health/HomeCareCensus>.

In this publication, where a local authority returned multiple client groups, in order to avoid double counting clients have been allocated to one client group. This has been based on the following order:

1. Dementia
2. Mental Health Problems
3. Learning Disability
4. Physical Disability
5. Addiction
6. Palliative Care
7. Carer's
8. Older people who do not fall into categories 1-7
9. Other vulnerable groups
10. Not known

For example, if a client has dementia and is an older person, then in table 2 they will appear in the dementia client group for the purpose of analysis.

Community Alarm and other Telecare

Telecare is the remote or enhanced delivery of health and social care services to people in their own home by means of telecommunications and computerised systems. Telecare usually refers to equipment and detectors that provide continuous, automatic and remote monitoring of care needs, emergencies and lifestyle changes, using information and communication technology (ICT) to trigger human responses, or shut down equipment to prevent hazards (Source: National Telecare Development Programme, Scottish Government).

Community Alarms are considered to be a basic introductory form of Telecare. A 'basic package' of pull cord, button, and/or pendant enables the user to create an alarm at the call or monitoring centre. Latterly, additional peripherals such as heat detectors have been included in the 'basic package'.

Some further examples of Telecare include (list not exhaustive):

- Key safe
- Pill Dispenser
- Property exit sensor
- Falls detector
- Flood detector
- Epilepsy alert
- Movement detectors

Further work be carried out over the next few months validating the data on all clients who receive a Community Alarm and/or other Telecare services.

Data completeness

A return was received from each local authority in Scotland.

Scottish Borders were unable to provide data on meals, although they do offer a meals service.

Dumfries & Galloway have introduced a new social work business system which has improved the accuracy of the data. Analysing trends over time for Dumfries & Galloway should be treated with caution as data has been collected differently for previous years.

Fife has improved the accuracy of the data in 2010. in previous years there may be some double counting which contributes to the decline in clients between 2009 and 2010. in addition, clients who actually received a service during the census week were included as opposed to clients who had a planned service during the census week which was reported on previously.

Totals may not add up to the sum of components due to rounding.

More detailed tables on home care services are available from our website at:

www.scotland.gov.uk/Topics/Statistics/Browse/Health/Data/HomeCare.

Other data sources

In order to calculate rates per population, the General Register Office for Scotland's (GROS) mid year population estimates have been used. For 2010 rates, the 2009 mid year population estimates have been used (the latest available).

This statistics release was published on 30th November 2010.

5. Annex

The Annex provides further detailed analysis.

Table 1:	Total Number of Home Care Clients and Hours of Service Provided by Local Authority, 2006-2010
Table 2:	Number of Home Care Clients and Hours Provided/Purchased, 2000-2010
Table 3:	Home Care Clients by Level of Service, 2000-2010
Table 4:	Home care clients by level of service and age group, 2010
Table 5:	Distribution of Clients by Level of Service, 2000-2010
Table 6:	Home Care Clients and hours by Provider of Service, 2000-2010
Table 7:	Age breakdown of Home Care Clients by Local Authority, 2010
Table 8:	Breakdown of Home Care Clients in receipt of a community alarm or other telecare service by Local Authority, 2010
Table 9:	Breakdown of Home Care Clients in receipt of a personal care service by Local Authority, 2010
Table 10:	Breakdown of Home Care Clients in receipt of a meals service by Local Authority, 2010
Table 11:	Clients who are receiving a meals service by Local Authority, 2010
Table 12:	Clients who are receiving a either a hot meals or frozen meals service by Local Authority, 2010

Totals may not add up to the sum of components due to rounding.

Table 1: Total Number of Home Care Clients and Hours of Service Provided by Local Authority, 2006-2010

Note there is a total of 13 clients who receive both meals services

NR : Scottish Borders did not return any information on meals services though they do provide a meals service

SCOTTISH GOVERNMENT STATISTICIAN GROUP

OUR AIM

To provide relevant and reliable information, analysis and advice that meet the needs of government, business and the people of Scotland.

OBJECTIVES

1. To produce statistics and analysis relevant to user needs by
 - Developing our understanding of customer requirements to ensure statistics are kept relevant and analysis is well targeted;
 - Developing the range of statistics and analysis we produce;
 - Where practicable improving timeliness;
 - Providing more statistics disaggregated by age, gender and ethnicity;
 - Developing more data for small areas through the Neighbourhood Statistics project;
 - Contributing to production of comparable statistics across the UK and internationally.
2. To ensure effective use of our statistics by
 - Contributing more directly to policy processes inside and where possible outside government;
 - Improving access to and presentation of data and analysis;
 - Improving the advice provided on statistics.
3. To work effectively with users and providers by
 - Maintaining arrangements to consult and involve users and providers;
 - Involving users and providers in planning developments in outputs and processes;
 - Minimising the burden on data providers through dropping or streamlining collections as appropriate, to ensure the benefits of the information justify the costs of collection.
4. To develop the quality of statistics by
 - Assuring and improving quality as an integral part of data collection and analysis and through regular reviews in line with National Statistics quality strategy;
 - Developing statistical methods, systems and classifications;
 - Working with the rest of the Government Statistical Service to develop joint approaches/solutions where appropriate.
5. To assure the integrity of statistics by
 - Maintaining and promoting integrity through implementation of the National Statistics Code of Practice and related protocols;
 - Safeguarding the confidentiality of data subjects.
6. To ensure the efficient and effective delivery of statistics products and services by
 - Making best use of all sources including administrative sources;
 - Working with other analysts to maximise the contribution of our own and other analysts' work;
 - Ensuring value for money;
 - Making best use of Information and Communications Technology;
 - Ensuring effective communication within the Statistician Group.
7. To develop our workforce and competences
 - Ensuring recruitment of staff with the necessary skills and potential;
 - Ensuring development of expertise amongst existing staff;
 - Promoting and upholding the standards of the statistics profession.

This is a National Statistics publication

"This is a National Statistics publication. It has been produced to high professional standards set out in the National Statistics Code of Practice Protocol - see www.statistics.gov.uk/about_ns/cop/default.asp

These statistics undergo regular quality assurance reviews to ensure that they meet customer needs. They are produced free from any political interference."

Details of pre-release access will be provided in the Scottish Government Statistics Website under 'Forthcoming Releases'
